DETAILED ACTION

Receipt is acknowledged of amendment filed on February 5, 2008. Claim rejections made under 35 U.S.C. § 102(b) as indicated in the previous Office action dated December 19, 2007 are withdrawn in view of the claim amendment made by applicant. A new rejection is made to address the amended claims. Claims 17, 38-41, 56-65 are pending.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 17, 38-41, 56-65 are rejected under 35 U.S.C. 102(b) as being anticipated by Drechsler et al. (US 6074654) as evidenced by STN Registry.

Claim 17 recites "[a] lip cosmetic comprising an anhydrous pigmented transfer resistant, film forming, cross-linked resinous silicone, composition for use in combination with a non reactive wetting agent having affinity to, the composition, said wetting agent being a liquid polymeric hydrocarbon having a number average molecular weight greater than 650 devoid of non-volatile silicone oils, and wherein the wetting agent overcoat composition flows smoothly over the composition". In this case, the claimed subject matter is a cosmetic composition comprising an anhydrous pigmented transfer resistant, film forming, cross-linked resinous silicone. The recitation "for use in combination with a non reactive wetting agent" and onward denotes the intended use and purpose of the cosmetic containing the cross-linked resinous silicone and does not further define the silicone composition. Claims 38-41 and 56-59 are directed to the

Art Unit: 1617

wetting agent overcoat composition of the preamble which recites for how the transfer-resistant silicone composition is used, and do not add any limitation to the claimed subject matter. Thus no patentable weight is given to these claims.

Drechsler discloses a lip color film-forming composition comprising crosslinked organosiloxane resins such as Wacker 803 from Wacker Silicones Corp. (trimethylsiloxysilicate) and pigments in a volatile carrier. See col. 7, line 46 - col. 9, line 2. The reference also discloses a method of enhancing the gloss, shine, and feel of lip composition by apply a complimentary product, known as "overcoat" or "topcoat", over the film formed after application of a transfer-resistant lip composition. See col. 10, line 63 - col. 16, line 7. The reference also teaches in col. 2, lines 7-13 that it is well known in the art to formulate a transfer-resistant cosmetic composition with trimethylated silica and volatile solvent. The reference teaches using the film forming silicone resin in the amount ranging from 10 to 95 %. See instant claims 63 and 64. Example 7 also contains 10 % of Bentone Gel VS-5PC, which contains quaternium-19 hectorite. See STN-Registry. See instant claims 60-62, 65.

Response to Arguments

Applicant's arguments with respect to claims 17, 38-41, and 56-65 have been considered but are unpersuasive.

Section 102 (b) Rejection made in view of Finkenaur et al. (US 4935228) as evidenced by Amoco Technical Data

The rejection is withdrawn in view of the claim amendment made by applicant, and applicant's arguments are moot.

Applicant states that the presently claimed invention is a "two part color coat liquid polymeric hydrocarbon system". However, the argument is not commensurate with the scope of the claim, and the features upon which applicant relies (i.e., overcoat composition) are not recited as a part of the claimed product in the rejected claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). As discussed above in the rejection, the claimed subject matter is a transfer-resistant lip cosmetic composition comprising cross-linked resinous silicone is not a two part composition system.

Section 102 (b) Rejection made in view of Manufacturing Chemist as evidenced by Exxon Mobile Chemical Technical Data

The rejection is withdrawn in view of the claim amendment made by applicant, and applicant's arguments are moot.

Conclusion

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1617

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
